Protecting the environment is the responsibility of the whole society. There are many ways to protect our earth. Here are a few suggestions:

The wasteful use of paper and plastic products has become a big problem. So we should use our own shopping bag instead of taking a new plastic one when we go shopping. We could save paper by writing on both sides of every sheet, and by re-using old paper bags and envelopes. Water is a valuable resource. We should try not to leave the water running while we are washing up or brushing our teeth. If we can, have showers instead of baths. They use about half as much water. We'll have a better world if each of us can do something to help.
